LANGUAGES

Ukrainian - Native
English - Pre-Intermediate

I am a Junior Front End developer with knowledge of HTML, CSS, JavaScript and React. I like to learn new things, solve interesting problems and find the best solutions. Because of this, I devote a lot of time and attention to improving my knowledge and practical skills.

PROJECT EXPERIENCE

Task Manager GooseTrack

[React, Redux, JavaScript, Node.js and other]

GitHub

Presentation of project

GooseTrack offers a comprehensive overview of your schedule, presenting all your tasks, events, and meetings in a visually appealing and intuitive format.

Role: developer

My main task was the implementation of the login and authorization page. Work with forms and their validation.

Phonebook (Individual project).

[React, Redux, JavaScript, Chakra UI, Axios]

GitHub

Contact list application. Realized registration for private work with contacts.

Role: developer

Filmoteka (Team project)

[HTML, SASS, JS, REST API, Axios, Parcel]

GitHub

An application for finding movies, viewing ratings and trailers.

The possibility of creating a personal cabinet and the functionality of adding movies to the library have been implemented. Gets data from TMDB API.

Role: developer

My task was to develop functionality for working with data arrays and local storage.

Mimino (Team project)

[Parcel, HTML, SASS, JS]

GitHub

A website for a hotel and restaurant complex. Has a description of rooms, restaurant menu. The site has an adaptive layout.

Role: developer

My task was to develop a block with contact information, make an adaptive layout, worked with iframe.
